

Premium Gel Latex Mortar Additives

Gel Latex Admix 101

An economical acrylic latex additive for use in place of water with thin set mortars, floor grouts and other cement mixes where adhesion, shock resistance, flexibility, chemical and freeze/thaw resistance is needed. Suitable for exterior and interior installations of all types of ceramic tile, brick, and natural stone. Formulated to bond to most surfaces. Admix 101 greatly reduces moisture penetration helping guard against freeze damage. When used in grout, the grout colors are enhanced. The new patented breakable gel formulation prevents latex solids separation.

Premium Gel Latex Admix 180

A special concentrated high strength bonding acrylic latex additive for use in place of water with thin set mortars and other cement mixes where increased adhesion, shock resistance, flexibility, chemical and freeze/thaw resistance is needed. Suitable for exterior and interior installations of all types of ceramic tile, brick, and natural stone. Formulated to bond to most surfaces. Admix 180 greatly reduces moisture penetration helping guard against freeze damage. The new patented breakable gel formulation prevents latex solids separation.

Premium Gel Latex Mortar Flexmix Additives

Gel Latex Flexmix 318

A highly flexible, yet economically priced, latex additive for use with thin set mortars and other cement mixes where **superior flexibility**, shock resistance, adhesion, chemical and freeze/thaw resistance is needed. Suitable for exterior and interior installations of all types of ceramic tile, brick, natural stone, and porcelain tile. Formulated to bond to most surfaces, including plywood. Flexmix 318 greatly reduces moisture penetration helping guard against freeze damage. The new patented breakable gel formulation prevents latex solids separation.

Premium Gel Latex Flexmax 335

An extraordinary super flexible latex additive for use with thin set mortars and other cement mixes where **maximum flexibility**, shock resistance, adhesion, chemical and freeze/thaw resistance is needed. Suitable for exterior and interior installations of all types of ceramic tile, brick, natural stone, and porcelain tile. Specially formulated to bond to most surfaces, including plywood. Flexmax 335 greatly reduces moisture penetration helping guard against freeze damage. The new patented breakable gel formulation prevents latex solids separation.

Premium Rapid Setting Latex Mortar Additives

Rapid Cure 400

A rapid setting latex additive that allows same day setting and grouting and light foot traffic. For use with thin set mortars, cement grouts and cement mortar beds. Suitable for exterior and interior installations of all types of ceramic tile, brick, and natural stone. Rapid Cure 400 greatly improves compression strength and flexibility and reduces moisture penetration helping guard against freeze damage. **Initial set** time is usually between **2 - 6 hours**.

Quick Set 426

An extremely quick setting latex additive specially formulated for super fast setting and grouting. For use with thin set mortars, cement grouts and cement mortar beds. Suitable for exterior and interior installations of all types of ceramic tile, brick, and natural stone. Quick Set 426 greatly improves compression strength and flexibility and reduces moisture penetration helping guard against freeze damage. **Initial set** time is usually between **30 min. - 2 hours**.
